

Like Magic

K C Baking Powder works like magic. Recipes formerly considered difficult to bake now come out of the oven light, dainty and delicious. It fairly makes you hungry to look at them.

KC
BAKING
POWDER

Is the housewife's best friend, lightening her burdens as well as the food. Wherever K C is used you will find healthy, happy families and a contented housewife. Complies with all pure food laws, both State and National. Jacques Mfg. Co., Chicago

PLOT TO KILL PRESIDENT WAS MEANT FOR PAPER FAKE

WASHINGTON, July 17.—An attempt was made on the life of President Taft today when some one sent to the White House an infernal machine addressed to the chief executive. Had the machine gone off probably every one in the office of the secretary to the president would have been killed.

As it was, only Sherman Allen, the assistant secretary, was hurt and he only slightly. He received a burn on his hand when he smothered the burning fuse which greeted him when he opened the box. Secret service men were promptly notified of the affair and the machine turned over to them for examination. When they had finished they reported that the machine contained six pounds of dynamite, powerful enough to have destroyed the executive office. There is little chance, though, of such an attempt on the life of the chief executive proving successful, for President Taft never opens any of his mail or express packages, every one of them passing through the hands of one or two secretaries.

WASHINGTON, D. C., July 18.—A

TITLED MAMMAS WAR ON GAMING

Gilded Youths Ruined in Houses in Aristocratic Neighborhood

LONDON, July 7.—As a result of complaints lodged at Scotland Yard by titled mammas, the sleuths of the London police are concentrating their attention upon particular houses in the aristocratic residential districts of Mayfair and Belgrave.

Scotland Yard is now up against one of the most difficult problems that ever confronts the secret service men—the running to earth of the expert gamblers who conduct secret poolrooms. Secret is the fashionable form of financial suicide for the gilded youths of town and the wealthy over-seas visitors who are bent on seeing life. There are at least twenty private houses where a flutter for high stakes can be indulged in.

While gambling was carried on within closed doors by people of mature years the authorities turned their blind eye towards the clubs. But now that callow youths have succumbed to the fascination of chemin-de-fer, the form of risk now most popular, the mothers of the young hopefuls of the English peerage are busy. The particular scandal that roused them to call in the aid of Scotland Yard was the case of a lad of eighteen, fresh from Eton, who was inveigled into one of these gambling hells and induced to play. The result was that he lost \$2,000, and his mother was called upon to redeem his paper promises to avoid a public scandal.

The anti-gambling crusaders have acquired two powerful recruits to their ranks in the Duchess of Marlborough and Mrs. Bradley Martin. Neither has any desire to be labeled as a "killjoy," but they are dead against these gambling dens.

There is, in fact, a growing feeling in the best section of society that a check must be placed on the dens if the neighborhood is not to become a second edition of the Cremorne gardens that were once the scandal of London.

Mayfair overlooks Hyde Park, and is a very favorite residential quarter, and as quite a number of wealthy Americans have established luxurious residences in the immediate locality, they feel they ought to be sure of having law and order respected there. The suppression of night clubs in slum areas caused the promoters to move into fashionable neighborhoods, and there, up to now, they have flourished exceedingly, free from police vigilance, even in streets hitherto regarded as examples of the highest respectability.

Two years ago street "bookmakers" who took small bets on horse racing flourished in the neighborhood of Sunderland House, the Duchess of Marlborough's residence, but she succeeded in ousting them. She is now determined to drive out the poolroom parasites who are ruining London's gilded youth.

CARPENTER MAKES ATTACK ON PARSON

KLAMATH FALLS, Ore., July 13.—Posses are in pursuit of Charles Lilley, a carpenter, who, it is alleged, yesterday attacked Rev. J. W. Worrell, pastor of the Presbyterian Church at Fort Klamath, throwing him down a flight of stairs and breaking his jaw in two places. The minister is in a serious condition.

It is claimed that there was no provocation for the attack made by Lilley on the minister. Lilley had been employed in the construction of a new church edifice, and some of his work was objected to by the pastor. The two men engaged in a dispute over the matter in the Jackson Hotel yesterday afternoon at 1 o'clock.

Lilley immediately secured a livery rig and drove to Chiloquin, where he abandoned the rig and mounted a horse, on which he started north through the wilderness toward Crescent.

Parties of pursuers were quickly on the trail of the fugitive, going on horseback, by team and by automobile.

Many a girl strives to make a name for herself rather than attempt to make a loaf of bread.

Most men who play the races never go broke, but they often come home that way.

practical joke concocted by newspaper reporters at the White House to "string a cub" resulted in the circulation all over the country today of what is declared by the secret service to be the most dangerous fake story of an attempted assassination of a President ever printed. The danger, it is stated, lies in the influence the yarn may have in inspiring cranks and persons of unsound mind to actually attempt something along the line suggested.

The story originally appearing this morning in a New York paper was taken up and spread broadcast before the authorities here were awake. It was to the effect that Sherman Allen, assistant secretary of the President, found an infernal machine upon his desk yesterday morning. On opening the package he discovered a slow-burning fuse, burning merrily and dangerously near the explosion point. Disregarding the use of a bucket of water, Allen heroically smothered the fuse with his naked right hand, burning a large and juicy section of his flesh.

There was great indignation among White House officials and those of the secret service over the "fake."

COMBINATION LOCK TO BALK UMBRELLA THIEF

Cartoon Leads to the Invention of a New Contrivance

LONDON, Eng., July 6.—The umbrella thief has met his match. A "proof" against would-be borrowers' umbrellas has at last been invented. E. Quaglia, a cloakroom attendant at the Cafe Royal restaurant, Regent street, is the inventor, and yesterday he told how a cartoon gave him the idea.

"In September last," he said, "there was a cartoon showing how easily umbrellas could be 'borrowed' never to be returned. I thought, 'Why not invent a thief-proof umbrella?' I finally succeeded."

The invention consists of a metal collar fixed near the handle of the umbrella, just above the ribs. On this collar there are three metal rings which may be revolved. Divisions on the rings are marked with figures and letters, and if your code number is 611, you twist the rings round until these figures are in line. Only when these figures are in the exact position is it possible to open the umbrella.

In any other position it is impossible to lift the metal collar off the ribs. The man who takes a "thief-proof umbrella" by mistake and tries to open it as he walks out of the building will be puzzled when he finds himself unable to put it up, and on closer examination will discover he has taken the wrong umbrella.

GROWTH OF BRITISH EMPIRE CALLS FOR NEW ORGANIZATION

LONDON, June 25.—The Hon. G. E. Foster delivered a brilliant speech on the occasion of the luncheon given in his honor in the Fishmonger's hall at the Royal Colonial Institute.

Lord Grey who presided welcomed Mr. Foster as a statesman of a wide outlook and a true and clear insight into the essential requirements of Imperial organization.

Mr. Foster commenced his speech by describing the growth and development of Canada since 1867 and touching on emigration, he said, he wished some one would bury the word "emigrant." The man from Nova Scotia who lived in British Columbia had not emigrated, he had simply moved; and that was what an Englishman or a Scotsman did when he went to Canada.

The progress of the dominions in the next 50 years made it imperative for them to consider the organization, the cooperation, the welding together of the empire. In the past 25 years the empire had outgrown its organization. Should it be said that the men of this generation had been unable to make the new organization necessary to keep the empire one?

Had, asked Mr. Foster, the British empire fulfilled its mission to its own future people or to the world, for which it still had great things in trust? That mission could only be fulfilled by cooperation, by ultimately calling to the seats of council the best experience and wisdom in the empire.

WATER TOYS

Europe and America turn out, for the edification of their children, many ingenious toys, but the occasional youngsters have nothing to compare with the strange expanding water toys with which the children of the far east have for centuries amused themselves.

These are placed in small wooden boxes similar to the little paint boxes so often seen in our own country. They have the appearance of soiled shavings, broken matches, and dilapidated toothpicks, but when thrown in to the water the ingenious toys at once exhibit properties that show them to be considerably more than mere bits of stick.

The wood of these toys has been kiln-dried, and immediately it touches the water it begins to absorb the water and to expand almost indefinitely. As it suddenly opens, becoming a very pretty toy. One stick will change in to a flower pot containing, it may be, to a rose bush in full bloom. Another becomes an oblong mancarin carrying an umbrella. Still another will take the form of a sea serpent. Then too there are toys which show as whales, tigers, crocodiles, etc.—New York Times.

Learn to keep your aches and pains under cover if you would be popular.

IS YOUR STOMACH IN BAD CONDITION?

Then by all means get a bottle of

Hostetter's
Stomach Bitter's

this very day. It makes weak stomachs strong, keeps the liver and bowels active. It also prevents Malaria, Fever and Ague.

CURE FOUND FOR KIDNEY DISEASES

NEW YORK, July 14.—What seems to be a cure for the hitherto apparently incurable diseases of diabetes and nephritis has been discovered, according to a statement authorized by the Metchnikoff laboratory in this city. They use a bacillus known as bulgaricus, which they say can swim through hydrochloric acid in the stomach, entering the intestines.

Dr. George Klemm of Bellevue Hospital, Dr. W. J. Beveridge, of Cornell Medical School and Dr. H. Young of the Metchnikoff laboratory say positively that the cure for these diseases which they have been using for practically all their cases in the last few months has worked so well that all patients are either entirely cured already or astonishingly advanced toward recovery through the lactic acid which the curative bacillus furnishes. The cure consists of a liquid—culture of the big blue bacillus, bulgaricus—taken from three to five times daily for only a few months. A tablespoonful after each meal is the ordinary dose.

PART OF THE MAINE TO BE PLACED IN OAKLAND PARK

OAKLAND, Cal., July 12.—A 1350-pound relic of the ill-fated battleship Maine arrived in Oakland this morning, to be placed in one of the city's parks. The relic is a torpedo port facing from the famous battleship, and was secured for this city by Park Commissioner J. P. Edoff and State Senator John W. Stetson, who witnessed the raising of the battered hulk from its resting place at the bottom of Havana harbor.

Secretary Henry Vogt of the Park Commission was in a quandary when he was informed that the freight charge on the relic, which was shipped from the navy yard at Washington, was \$33. He did not have the money. Neither was the money in the treasury of the Park Commissioners, as this is the end of the fiscal year, and the new budget will not have been apportioned until November. The problem was finally solved when Edoff presented a personal check for the amount.

AGED SOMNAMBULIST FALLS TO HIS DEATH

PHILADELPHIA, Pa., July 13.—Nicholas Altman, 68 years old, walked in his sleep, fell downstairs and was killed today, notwithstanding that he had been tied to Mrs. Altman with strong twine upon retiring.

The family knew Altman was a somnambulist, and every night on retiring the husband and wife joined together at the ankles with a piece of twine. This morning Mrs. Altman did not hear her husband get out of bed. She was awakened by the noise made by the body when it struck the first floor.

Investigation proved that Altman, apparently, knowing that he had been tied, reached for his trousers pocket while asleep, procured his knife and cut the string. The open knife was found beside the bed.

"How did the doctor persuade you to give up smoking?"
"Made his bill so big I couldn't afford to buy any more tobacco."
